Multiplication de Fractions (A)

Nom: _____ Date: _____ Score: ____ /10

Multipliez les fractions, simplifiez le résultat, et convertissez-le en nombres mixtes.

1. $\frac{19}{6} \times \frac{4}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

2. $\frac{10}{7} \times \frac{29}{6} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

3. $\frac{11}{4} \times \frac{24}{7} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

4. $\frac{23}{6} \times \frac{15}{8} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

5. $\frac{13}{4} \times \frac{38}{9} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

6. $\frac{9}{8} \times \frac{31}{6} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

7. $\frac{11}{8} \times \frac{20}{9} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

8. $\frac{7}{2} \times \frac{10}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$

9. $\frac{14}{3} \times \frac{3}{2} = \frac{\quad}{\quad} = \frac{\quad}{\quad} =$

10. $\frac{9}{7} \times \frac{22}{9} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \quad\frac{\quad}{\quad}$
