

Graphique d'Équations Linéaires (J)

Résolvez ce graphique à l'aide d'un système d'équations.

$$y = \left(\frac{4}{3}\right)x - 1$$

$$y = \left(\frac{1}{6}\right)x - 3$$

$$y = \left(\frac{3}{2}\right)x + 8$$

$$y = \left(-\frac{4}{3}\right)x - 3$$

Graphique d'Équations Linéaires (J) Réponses

Résolvez ce graphique à l'aide d'un système d'équations.

$$y = (4/3)x - 1$$

$$y = (1/6)x - 3$$

$$y = (3/2)x + 8$$

$$y = (-4/3)x - 3$$
