

Conversion de Fractions (B)

Instructions: Exprimez chacune des fractions ci-dessous en centièmes.

$\frac{4}{5} = \underline{\quad} =$	$\frac{80}{100} = \underline{\quad} = 0.80$	$\frac{11}{50} = \underline{\quad} = \frac{22}{100} = \underline{\quad}$	$\frac{19}{25} = \underline{\quad} = \frac{1}{100} = \underline{\quad}$
-------------------------------------	---	--	---

$\frac{20}{25} = \underline{\quad} =$	$\frac{5}{10} = \underline{\quad} =$	$\frac{24}{25} = \underline{\quad} =$
---------------------------------------	--------------------------------------	---------------------------------------

$\frac{13}{20} = \underline{\quad} =$	$\frac{11}{50} = \underline{\quad} =$	$\frac{6}{20} = \underline{\quad} =$
---------------------------------------	---------------------------------------	--------------------------------------

$\frac{4}{20} = \underline{\quad} =$	$\frac{4}{5} = \underline{\quad} =$	$\frac{3}{25} = \underline{\quad} =$
--------------------------------------	-------------------------------------	--------------------------------------

$\frac{13}{20} = \underline{\quad} =$	$\frac{3}{4} = \underline{\quad} =$	$\frac{15}{20} = \underline{\quad} =$
---------------------------------------	-------------------------------------	---------------------------------------

$\frac{11}{50} = \underline{\quad} =$	$\frac{7}{50} = \underline{\quad} =$	$\frac{18}{20} = \underline{\quad} =$
---------------------------------------	--------------------------------------	---------------------------------------

$\frac{11}{50} = \underline{\quad} =$	$\frac{8}{25} = \underline{\quad} =$	$\frac{3}{25} = \underline{\quad} =$
---------------------------------------	--------------------------------------	--------------------------------------

$\frac{1}{50} = \underline{\quad} =$	$\frac{11}{50} = \underline{\quad} =$	$\frac{11}{50} = \underline{\quad} =$
--------------------------------------	---------------------------------------	---------------------------------------
