

## Addition de Fractions (D)

Évaluez chaque expression.

1.  $\frac{11}{2} + \frac{13}{2}$

5.  $\frac{17}{20} + \frac{19}{20}$

9.  $\frac{10}{9} + \frac{16}{9}$

2.  $\frac{13}{6} + \frac{17}{6}$

6.  $\frac{19}{8} + \frac{9}{8}$

10.  $\frac{13}{8} + \frac{15}{8}$

3.  $\frac{9}{14} + \frac{11}{14}$

7.  $\frac{16}{7} + \frac{5}{7}$

11.  $\frac{2}{13} + \frac{14}{13}$

4.  $\frac{15}{4} + \frac{7}{4}$

8.  $\frac{12}{5} + \frac{1}{5}$

12.  $\frac{2}{3} + \frac{20}{3}$

## Addition de Fractions (D) Answers

Évaluez chaque expression.

$$1. \frac{11}{2} + \frac{13}{2} \\ = 12$$

$$5. \frac{17}{20} + \frac{19}{20} \\ = \frac{9}{5} = 1\frac{4}{5}$$

$$9. \frac{10}{9} + \frac{16}{9} \\ = \frac{26}{9} = 2\frac{8}{9}$$

$$2. \frac{13}{6} + \frac{17}{6} \\ = 5$$

$$6. \frac{19}{8} + \frac{9}{8} \\ = \frac{7}{2} = 3\frac{1}{2}$$

$$10. \frac{13}{8} + \frac{15}{8} \\ = \frac{7}{2} = 3\frac{1}{2}$$

$$3. \frac{9}{14} + \frac{11}{14} \\ = \frac{10}{7} = 1\frac{3}{7}$$

$$7. \frac{16}{7} + \frac{5}{7} \\ = 3$$

$$11. \frac{2}{13} + \frac{14}{13} \\ = \frac{16}{13} = 1\frac{3}{13}$$

$$4. \frac{15}{4} + \frac{7}{4} \\ = \frac{11}{2} = 5\frac{1}{2}$$

$$8. \frac{12}{5} + \frac{1}{5} \\ = \frac{13}{5} = 2\frac{3}{5}$$

$$12. \frac{2}{3} + \frac{20}{3} \\ = \frac{22}{3} = 7\frac{1}{3}$$
