

## Addition de Fractions Mixtes (G)

Évaluez chaque expression.

1.  $1\frac{7}{12} + 3\frac{1}{2}$

5.  $5\frac{2}{3} + 1\frac{14}{45}$

9.  $1\frac{1}{2} + 1\frac{7}{13}$

2.  $2\frac{2}{7} + 1\frac{1}{8}$

6.  $3\frac{1}{2} + 1\frac{22}{31}$

10.  $2\frac{9}{10} + 1\frac{1}{12}$

3.  $1\frac{4}{5} + 2\frac{10}{17}$

7.  $1\frac{5}{23} + 1\frac{1}{3}$

11.  $1\frac{5}{6} + 1\frac{1}{6}$

4.  $9\frac{2}{3} + 1\frac{5}{7}$

8.  $1\frac{7}{36} + 1\frac{5}{9}$

12.  $1\frac{2}{45} + 1\frac{4}{5}$

## Addition de Fractions Mixtes (G) Answers

Évaluez chaque expression.

$$1. 1\frac{7}{12} + 3\frac{1}{2} \\ = \frac{61}{12} = 5\frac{1}{12}$$

$$5. 5\frac{2}{3} + 1\frac{14}{45} \\ = \frac{314}{45} = 6\frac{44}{45}$$

$$9. 1\frac{1}{2} + 1\frac{7}{13} \\ = \frac{79}{26} = 3\frac{1}{26}$$

$$2. 2\frac{2}{7} + 1\frac{1}{8} \\ = \frac{191}{56} = 3\frac{23}{56}$$

$$6. 3\frac{1}{2} + 1\frac{22}{31} \\ = \frac{323}{62} = 5\frac{13}{62}$$

$$10. 2\frac{9}{10} + 1\frac{1}{12} \\ = \frac{239}{60} = 3\frac{59}{60}$$

$$3. 1\frac{4}{5} + 2\frac{10}{17} \\ = \frac{373}{85} = 4\frac{33}{85}$$

$$7. 1\frac{5}{23} + 1\frac{1}{3} \\ = \frac{176}{69} = 2\frac{38}{69}$$

$$11. 1\frac{5}{6} + 1\frac{1}{6} \\ = 3$$

$$4. 9\frac{2}{3} + 1\frac{5}{7} \\ = \frac{239}{21} = 11\frac{8}{21}$$

$$8. 1\frac{7}{36} + 1\frac{5}{9} \\ = \frac{11}{4} = 2\frac{3}{4}$$

$$12. 1\frac{2}{45} + 1\frac{4}{5} \\ = \frac{128}{45} = 2\frac{38}{45}$$
