

Division de Fractions (I)

Évaluez et simplifiez chaque expression.

$$1. \frac{1}{9} \div \frac{10}{3} \div \frac{1}{6}$$

$$5. \frac{5}{3} \div \left(\frac{3}{7} \div \frac{1}{2} \right)$$

$$9. \frac{20}{3} \div \frac{24}{11} \div \frac{15}{2}$$

$$2. \frac{1}{3} \div \left(\frac{1}{5} \div \frac{3}{5} \right)$$

$$6. \frac{20}{3} \div \left(\frac{19}{2} \div \frac{3}{4} \right)$$

$$10. \frac{3}{4} \div \frac{2}{5} \div \frac{15}{2}$$

$$3. \frac{4}{3} \div \frac{3}{4} \div \frac{2}{3}$$

$$7. \frac{11}{4} \div \left(\frac{3}{2} \div \frac{5}{2} \right)$$

$$11. \frac{21}{4} \div \left(\frac{1}{4} \div \frac{2}{3} \right)$$

$$4. \frac{2}{3} \div \frac{7}{5} \div \frac{10}{11}$$

$$8. \frac{3}{2} \div \left(\frac{1}{3} \div \frac{3}{2} \right)$$

$$12. \frac{7}{2} \div \left(\frac{24}{11} \div \frac{24}{7} \right)$$
