

Graphique d'Équations Linéaires (A)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (A) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (-2/3)x - 9$

équation: $y = (-8/7)x - 6$

équation: $y = (8/3)x - 2$

équation: $y = (2/3)x + 9$

Graphique d'Équations Linéaires (B)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (B) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (8/5)x - 1$

équation: $y = (1/8)x + 2$

équation: $y = (5/4)x - 6$

équation: $y = (-2/3)x + 7$

Graphique d'Équations Linéaires (C)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (C) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (5/8)x - 6$

équation: $y = (1/2)x + 8$

équation: $y = (2/5)x$

équation: $y = (8/5)x - 2$

Graphique d'Équations Linéaires (D)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (D) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (4/3)x + 6$

équation: $y = (1/8)x - 2$

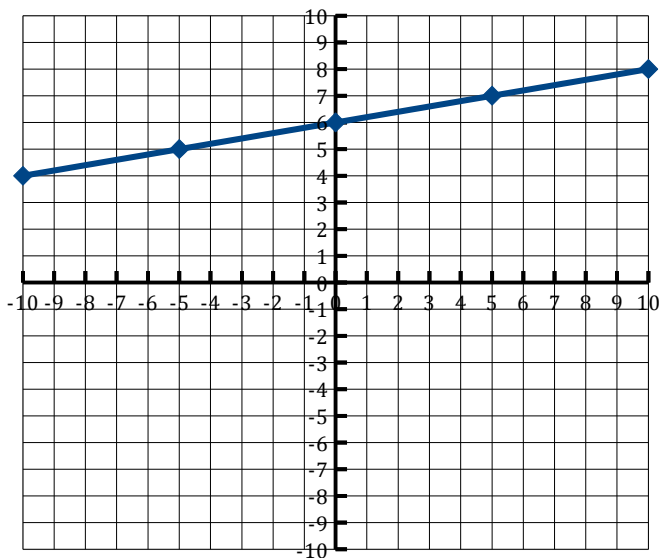

équation: $y = (-7/8)x$

équation: $y = (-5/6)x$

Graphique d'Équations Linéaires (E)

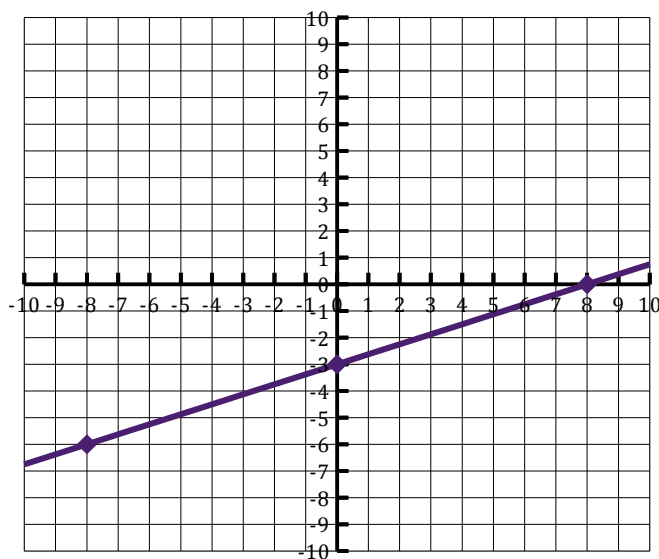

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (E) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (1/5)x + 6$

équation: $y = (4/5)x - 4$

équation: $y = (3/8)x - 3$

équation: $y = (-6/5)x - 6$

Graphique d'Équations Linéaires (F)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (F) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (4/3)x + 2$

équation: $y = (-8/7)x - 5$

équation: $y = (-8/3)x + 3$

équation: $y = (1/4)x + 2$

Graphique d'Équations Linéaires (G)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (G) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (-4/3)x - 8$

équation: $y = (5/4)x + 7$

équation: $y = (-1/6)x - 2$

équation: $y = (3/8)x + 9$

Graphique d'Équations Linéaires (H)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (H) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (-1/8)x + 2$

équation: $y = (-7/8)x - 9$

équation: $y = (-5/8)x - 3$

équation: $y = (-7/8)x + 8$

Graphique d'Équations Linéaires (I)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (I) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (3/4)x + 4$

équation: $y = (5/6)x + 3$

équation: $y = (-5/2)x - 4$

équation: $y = (-5/2)x$

Graphique d'Équations Linéaires (J)

Trouvez l'équation de chaque axe.

équation:

équation:

équation:

équation:

Graphique d'Équations Linéaires (J) Réponses

Trouvez l'équation de chaque axe.

équation: $y = (-8/3)x + 1$

équation: $y = (-1/8)x - 5$

équation: $y = (4/5)x + 6$

équation: $y = (-2/5)x + 9$
