

Sont-Elles Equivalentes? (A)

Cochez les équations qui montrent des fractions équivalentes.

$$\frac{5}{5} = \frac{30}{30}$$

$$\frac{1}{9} = \frac{15}{117}$$

$$\frac{3}{3} = \frac{21}{21}$$

$$\frac{4}{11} = \frac{44}{121}$$

$$\frac{5}{5} = \frac{50}{50}$$

$$\frac{2}{2} = \frac{18}{12}$$

$$\frac{2}{8} = \frac{10}{112}$$

$$\frac{3}{4} = \frac{36}{24}$$

$$\frac{6}{7} = \frac{66}{77}$$

$$\frac{9}{10} = \frac{108}{130}$$

$$\frac{5}{6} = \frac{25}{36}$$

$$\frac{9}{11} = \frac{117}{66}$$

$$\frac{6}{9} = \frac{36}{54}$$

$$\frac{2}{3} = \frac{28}{42}$$

$$\frac{1}{3} = \frac{12}{36}$$

$$\frac{1}{8} = \frac{11}{88}$$

$$\frac{1}{11} = \frac{12}{77}$$

$$\frac{8}{10} = \frac{120}{150}$$

$$\frac{2}{8} = \frac{18}{72}$$

$$\frac{2}{7} = \frac{22}{35}$$

$$\frac{6}{6} = \frac{30}{30}$$

$$\frac{1}{2} = \frac{14}{28}$$

$$\frac{7}{11} = \frac{56}{66}$$

$$\frac{2}{5} = \frac{22}{25}$$

$$\frac{1}{9} = \frac{8}{72}$$

$$\frac{7}{8} = \frac{77}{72}$$

$$\frac{6}{9} = \frac{54}{135}$$

$$\frac{2}{4} = \frac{12}{24}$$

$$\frac{1}{8} = \frac{14}{112}$$

$$\frac{4}{5} = \frac{28}{65}$$

$$\frac{2}{2} = \frac{20}{16}$$

$$\frac{1}{5} = \frac{10}{50}$$

$$\frac{4}{10} = \frac{32}{80}$$

$$\frac{4}{6} = \frac{48}{72}$$

$$\frac{4}{4} = \frac{56}{56}$$

$$\frac{5}{5} = \frac{65}{65}$$
