Sont-Elles Equivalentes? (D)

Cochez les équations qui montrent des fractions équivalentes.

$\frac{3}{3} = \frac{27}{36}$	$\frac{1}{2} = \frac{8}{18}$	$\frac{2}{11} = \frac{20}{132}$	$\frac{11}{11} = \frac{121}{121}$
$\frac{3}{12} = \frac{42}{168}$	$\frac{11}{12} = \frac{77}{84}$	$\frac{3}{8} = \frac{27}{72}$	$\frac{8}{10} = \frac{64}{50}$
$\frac{7}{8} = \frac{77}{88}$	$\frac{5}{11} = \frac{70}{154}$	$\frac{5}{7} = \frac{30}{42}$	$\frac{4}{4} = \frac{48}{48}$
$\frac{2}{8} = \frac{20}{104}$	$\frac{5}{8} = \frac{60}{96}$	$\frac{1}{3} = \frac{13}{39}$	$\frac{1}{7} = \frac{5}{56}$
$\frac{1}{4} = \frac{6}{24}$	$\frac{3}{6} = \frac{21}{90}$	$\frac{2}{5} = \frac{18}{55}$	$\frac{6}{8} = \frac{54}{80}$
$\frac{3}{5} = \frac{42}{30}$	$\frac{5}{6} = \frac{45}{66}$	$\frac{4}{4} = \frac{40}{40}$	$\frac{10}{11} = \frac{60}{66}$
$\frac{1}{12} = \frac{5}{156}$	$\frac{3}{10} = \frac{24}{140}$	$\frac{7}{10} = \frac{49}{150}$	$\frac{1}{3} = \frac{6}{39}$
$\frac{11}{11} = \frac{154}{154}$	$\frac{3}{11} = \frac{42}{66}$	$\frac{6}{9} = \frac{72}{108}$	$\frac{1}{11} = \frac{8}{88}$
$\frac{1}{4} = \frac{5}{56}$	$\frac{5}{8} = \frac{35}{56}$	$\frac{3}{3} = \frac{30}{30}$	$\frac{1}{2} = \frac{14}{28}$
